

Summer Camp at Armonk Tennis Club

I hereby attest that I have been informed of the following pertaining to COVID-19:

- People who are 65 years and older and people of any age who have serious underlying medical conditions or are at higher risk for severe illness from COVID-19 are recommended to stay at home. Medical conditions associated with a higher risk for severe illness from COVID-19 include:
 - · Chronic lung disease or moderate to severe asthma
 - · Serious heart conditions
 - · Weakened immune system

Many conditions can cause a person to be immunocompromised, including cancer treatment, smoking, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications.

- Severe obesity (body mass index of 40 or higher)
- Diabetes
- Chronic kidney disease undergoing dialysis
- Liver disease

Individuals and families should consult their healthcare provider to determine whether they have medical conditions that place them at risk.

• People living in households with individuals who are 65 years and older or have higher risk for severe illness from COVID-19 are recommended to stay home.
